## ENESS Lumes Scheduler

Pictured below is what the scheduler looks like while it is running:

At the top of the window you can see if the scheduler has detected a running instance of the Lumes wall software. Pressing the "Restart Lumes" button will end the current instance of the software and relaunch it.

1. The scheduler controls the time of day the content will start and stop running. These are set with the **Starting Time**, and **Ending Time** combo boxes. The left box sets the Hour, the right box the minutes.
2. The current running content, is listed on the scheduler as well, as you can see it is currently set to be running the **New England Winter** scene.
3. The Time is set in 24 Hour format. The default settings for the software is to start at 6:00am and end at 10:00pm.

Load Schedule Save Schedule + Add Schedule Item

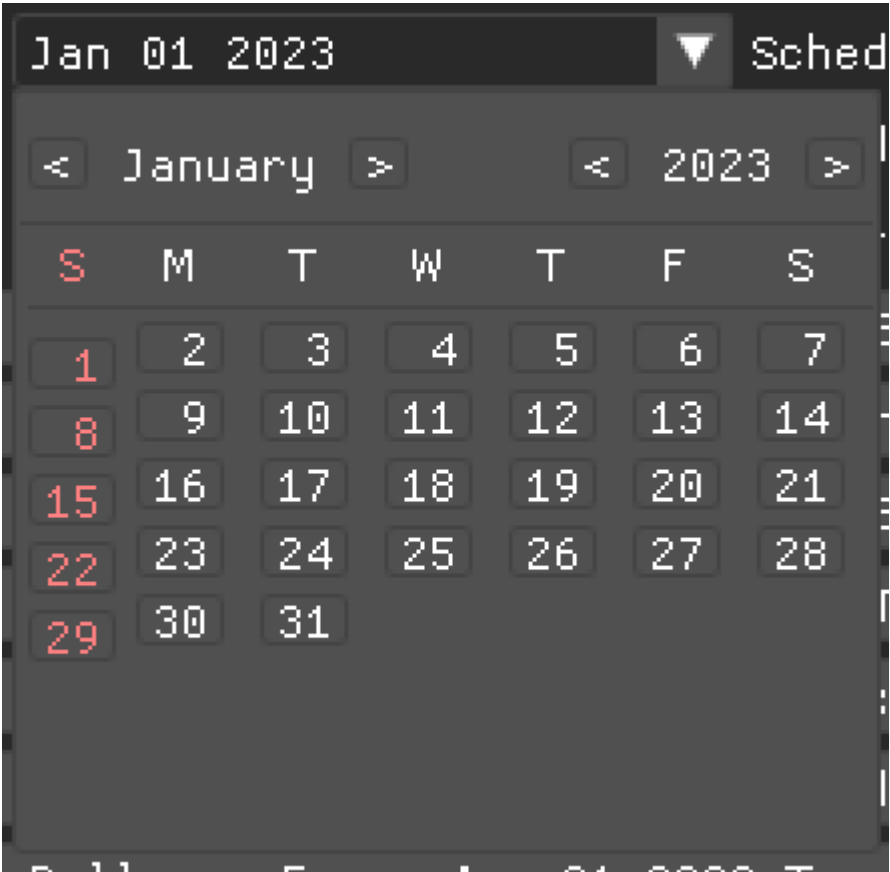

4. **Load Schedule** loads in the last saved schedule, this can be usefull if you want to go back to the values as they were set before the software was loaded, or the last time they were saved.
5. **Save Schedule** saves the changes you've made to the current schedule, this includes the **Starting Time**, and **Ending Time**.
6. **Add Schedule Item** adds a new item to the schedule list.

```
▶ * New England Winter From: Jan 01 2023 To: Jan 31 2023 * ACTIVE
▶ Under The Sea From: Feb 01 2023 To: Feb 28 2023
▶ Worms From: Mar 01 2023 To: Mar 31 2023
▶ Rain Umbrella From: Apr 01 2023 To: Apr 30 2023
▶ Butterflies From: May 01 2023 To: May 31 2023
▶ Fireworks From: Jun 01 2023 To: Jun 30 2023
▶ Birds From: Jul 01 2023 To: Jul 31 2023
▶ Balloons From: Aug 01 2023 To: Aug 31 2023
▶ Paper Planes From: Sep 01 2023 To: Sep 30 2023
▶ Painting From: Oct 01 2023 To: Oct 31 2023
▶ New England Fall From: Nov 01 2023 To: Nov 30 2023
▶ Penguins From: Dec 01 2023 To: Dec 31 2023
```

7. Above you can see the current setup schedule. There are currently 12 items, one for each month of the year. Each item also corresponds to one of the **Content Scenes** inside the Lumes software. There are 12 different content scenes you have been provided with.
8. The currently active schedule is highlighted, indicated by the word **ACTIVE** behind it.
9. Clicking on the arrow on the left of a schedule item expands it out to the following window:

```
▼ * New England Winter From: Jan 01 2023 To: Jan 31 2023 * ACTIVE
  Jan 01 2023 ▼ Scheduled Start Date
  Jan 31 2023 ▼ Scheduled End Date
  New England Winter ▼ Program
▶ Under The Sea From: Feb 01 2023 To: Feb 28 2023
```

10. Here you are able to change the dates that the content runs from and to, and which content will be running between these times.
11. Changing the program of the currently active schedule item, will also update the content instantly currently running on the Lumes Wall.

12. Clicking on the **down arrow** next to the start or end date will make a **Date Selection** popup appear. Here you are able to set the start and end day of the selected content.

**Note** If the end date of the content is set after the starting date of the next item in the list it will have precedence over any content following it. I.E: If you changed the end date of the first content, "New England Winter" to the 3rd of February, then it will run until the 3rd of February, and the second set of content will not start until the 4th of February, even though its start date is set to be the 1st of February.
